It's making more than just headlines.

The Airbus A380 has made its name as the world's largest, greenest passenger aircraft. But the big news for operators is that the A380 has made big profits too. Whether it's being used to reduce the number of flights and create real cost savings while keeping similar capacity. Or to offer more capacity with fewer take-off slots at a lower cost per seat than any other large aircraft. Either way, passengers simply love it, and operators love the commercial advantages it brings. The A380's benefits are in hard cash, not just headlines. **Airbus A380. See the bigger picture.**
